### Beneficiary% by Area Name

### disability ratio, fund% and Beneficiary% by Area Name

- As per 2011 census, approximately 2.21% of Indian population is specially abled. Uttar Pradesh, Maharashtra, Bihar, Andhra Pradesh, West Bengal are top 5 states having highest specially abled population w.r.t total Indian population in a given order. Sikkim, Odisha, Jammu Kashmir, Andhra Pradesh, Maharashtra respectively are top 5 states having highest specially abled population w.r.t. corresponding state population.

- Kerala has highest percent of intellectually challenged population w.r.t. corresponding state population.

- Odisha and Sikkim are states with highest males and female specially abled population respectively w.r.t. total Indian population. Maharashtra and Andhra Pradesh are states with highest males and female specially abled population respectively w.r.t. corresponding state population.

- Puducherry has the highest movement disability in male population w.r.t. corresponding male state population. Puducherry has the highest movement disability in female population w.r.t. corresponding female state population.

- Total fund amount of 47.29K (Rs. in Lakhs) was released and utilized under ADIP program and 856.44K were total beneficiaries during year 2013-17.

- Funds assigned to each state is fairly justifiable except the observation that the number of beneficiaries in Bihar is very low considering disability ratio.
